## Mobility In Practice

# Modular & Industrial Solutions

Whether it be the workshop area, electronics lab, in health care applications or in office environment, our extensive standard range provides diverse solutions for the safe and secure mobility of valuable equipment. Our modular designs enable versatile cart configurations, immediately or at any time later on.

For demanding ESD environments Knürr provides various cart systems – ranging from robust transport trolleys through to the fully equipped measurements and diagnostics cart.

Ergonomic details also simplify daily tasks in a wide range of environments.

An extensive range of accessories supplements Knürr's mobile equipment carriers as requested by the customer: Flat screen holders, ESD castors, isolating transformers and leakage detectors, cable routing elements and all kinds of accessories for the medical sector.

## Knürr EliMobil® Strong points

### Aesthetics

- Modern and slim look with dynamic shapes
- Extrusions and die-cast rockers in modern design with narrow crosspiece
- Side panels of the shelves dynamically shaped
- Cable ducts are aesthetic and space-savily integrated into the extrusion

### Functionality

- High EMC safety with separate cable routing of mains and data cables
- Storage space in the crosspiece for socket strips and excess cables
- Space-saving with optional use of surface areas with 2 basic widths\* (450 mm and 550 mm)  
\* useable internal dimension between the extrusions
- Worktop can be loaded up to 300 N  
(overall load rating of the trolley: up to 1800 N)
- Distributed load drawer extension up to 100 N

### Variability

- Numerous individual models possible
- All modules can be combined and mounted in the easiest possible way
- Individual configuration with adjustment of the installation components at 25 mm intervals
- Simple and quick adjustment without special tools

### Convenience

- Easy to clean with coated surfaces
- All surfaces are corrosion-free, impact and scratch-proof and acid and disinfection agent-resistant
- Vibration-free and noiseless transport with special rubber smooth-running castors Ø 100 mm

## Knürr EliMobil® System Components

### Technical data

- Modules can be installed at increments of 25 mm

#### Maximum static load rating

- Per basic frame: 1800 N
- Per castor: 750 N
- Surface load per worktop: 300 N

#### Material

Basic rack consists of:

- Extrusions: extruded aluminium
- Rockers: die-cast aluminium
- Crosspiece: sheet steel

Worktops: sheet steel/plastic

Storage shelf, storage tray, drawer module: sheet steel

#### Finish

- Metal parts: powder-coated texture
- Plastic parts: coated texture

#### Color combinations

##### Final digit of order number.2:

- Basic frame: RAL 7035 light-grey
- Plastic caps: RAL 5003 sapphire blue
- Castors: RAL 9011, graphite black

#### How supplied

Fully assembled

### Stability

- Total load rating of up to 2100 N
- Worktops each with up to 800 N load rating
- High stability with low-lying centre of gravity
- Distributed load drawer extension up to 200 N
- Torsional strength with stable aluminium extrusions on die-cast aluminium stabilizers and cross-piece of sheet steel
- Optimal stability for equipment set up in the trolley with raised edges all around the worktop

### Convenience

- Optimised operation with additional module components, such as
  - Cable duct
  - Rear panel
  - Euro mains distributor
  - Master switch
  - Socket strip
- Ergonomically optimal adjustment with
  - Keyboard extension with side mouse table
  - Pull-out shelves
- Effortless management of obstacles and uneven floors with Ø 125 mm large smooth-running castors
- Positioning with 2 lockable castors
- No marks and scratches on the doors, panels and fittings due to the integrated plastic bumper cap

### Variability

- Standard and ESD model components
- Modular designs enable numerous individual models
- Versatile applications ranging from the simple storage trolley to the complex medical trolley
- Simple and quick adjustment without special tools

### Technical data

MOB20051

- Modules can be installed in 50 mm increments in height
- Smooth-running castors, Ø 125 mm, two with stoppers

#### Material

Basic rack consists of:

- Extrusions: extruded aluminum
- Runners: die-cast aluminum
- Crosspiece: sheet steel

Worktop:

sheet steel

Other modules: combination of sheet steel with laminated particle board, or sheet steel.

#### Finish

Metal parts: powder-coated texture

Laminated sheet: fine-textured

#### Color

Extrusions, runners, castors:

RAL 5003, sapphire blue

or RAL 7021 ESD

or RAL 7035, light gray

Modules:

RAL 7035, light gray

ESD castors: black

#### Maximum static load rating

Per basic rack: 2,100 N

Per castor: 750 N

Surface load per worktop:

up to 800 N

## Knürr SynergyCart® Strong points

### The functional solution

- IT cart for hospitals (ward cart)
- Equipment cart for health care
- Test cart in production/workshops
- Storage consignment, scanner cart
- Ideal for automotive and industrial projects where small, space-saving carts with cable management are required
- The unmistakable design is harmonized with the Knürr Synergy® product family
- Fully assembled and turnkey ready for use
- Tested in accordance to the DIN EN 60601\_1
- Strong, and yet attractively designed sheet steel basic frame with vertical extruded aluminum supports for the highest possible safety and stability
- ESD versions of all modules available
- Modern, smooth-running double wheel castors in conductive version
- Ergonomics in detail:

All modules can be mounted at any height, absolutely in accordance with the user's individual wishes

- User-friendly cable management with plenty of room for cables, socket strips, isolating transformers, cable exit to the front over the entire height

### Material

- Sheet steel/extruded aluminum tube handle
- Cover with master switch optionally
- Aluminum extrusion vertical supports
- Modules can be mounted stepless on the height via T-slots on the aluminum extrusion
- Welded sheet steel base unit
- Spacious cable exit from the supports in the base tray
- Twin swivel castors, Ø125 mm
- Bumper caps

## Knürr MetraMobil® Strong points

MET00003

MET 20000

MET00034

MET00037

### ■ Variability

- A completely individual cart can be configured from a basic frame in 2 heights, 3 colors and 5 module components.
- Ideal height adjustment with variable height setting of the shelves

### ■ Stability

- High load rating:
  - up to 600 N per worktop
  - up to 2200 N for full trolley
- Distributed load drawer extension up to 100 N
- High stability with advanced sheet steel construction

### ■ Functionality

- Suitable for the most varied areas of application: PC or printer station, IT-cart, logistics or laboratory

### ■ Cable management

- Safe cable routing with two cable ducts integrated in the extrusion
- Clear and orderly cable management with integration of accessory parts, e.g. a socket strip, which can be mounted on the extrusion.

### ■ Well-thought out solutions

- Vision and contact protection provided by the easy "on-off" rear panel, no tools needed
- Orderly arrangement of small material with drawer module with removeable small parts tray
- Smooth running 3/4 pull-out "Quattro" guide

### ■ ESD versions

- Safety and protection in demanding ESD environments provided by ESD castors and ESD powder coating.

MOB20100

## Leakage Detector Set

- Monitoring and alert unit for secondary isolation resistance
- For use in combination with isolating transformers IMed series
- Precise warning of isolating failures

**Technical data**  
230 VAC, IP 40

In case of defect the ELG signals an optical and acoustic warning. The resistance is monitored. If the minimum level of 50 kOhm is short fallen, an optical (LED) and acoustic (Beeper) signal is triggered. The ELG is directly connected to one of the output plugs of the IMED transformers. Its function is solely to signal isolating failures.

**The ELG is exclusively approved in combination with the Noratel IMED transformers.**

H = Height  
D = Depth  
h = Installation height  
d = Useful depth  
L = Length  
HU = Standard height unit, 1 HU = 44.45 mm  
19" = 482.6 mm, (ideal for 19" components in acc. with DIN 41494)  
UP = Unit of packaging  
kg = Weight

Conversion: 1 inch = 25.4 mm  
Replace „x“ with the number of your color choice

**P** = assemble to order (shipped within 10 working days)

Caution: In case of larger orders, delivery times may increase.

MOB00339

## IV-Pole

- Can only be used in combination with standard rails, BN 00.128.016.1 or B/N 00.705.068.x SynergyCart® holder for infusion stands
- 4 Hooks
- Chrome-plated
- Height adjustable
- Width, approx. 110 cm

### Load rating

2 kg per hook

### Supply schedule

1 Serum holder including mounting (without standard rails)

W	H	D	Order no.	UP
			00.306.955.0	1 unit

MOB00337

## Hook-On Block For holding test pins

- Note**  
Only for Knürr DacoMobile® and Knürr EliMobil®

- Material**  
Plastic

### Color

RAL 9011, graphite black

### Supply schedule

1 hook-on block  
Mounting material

W	H	D	Order no.	UP
			00.701.090.9	1 unit

## Multi-Functional Extrusions for Flat Screen Supports

- For mounting between the Knürr Mobile vertical extrusions
- Sturdy and stable Knürr TFT Adapter connection

- Note**  
TFT adapters are not included in the supply schedule, please order separately

- Material**
  - Extruded aluminum extrusions
  - Sheet steel mounting plates

### Finish

Metal parts – powder-coated, RAL 9006, white aluminum

### How supplied

Flat-packed kit

### Supply schedule

2 Funktional rails  
Mounting material

W	Model	Order no.	UP
496	Knürr DacoMobile®	00.101.007.9	1 unit
596	Knürr DacoMobile®	00.101.008.9	1 unit
500	Knürr MetraMobil®	00.701.055.9	1 unit
450	Knürr EliMobil®	00.306.980.9	1 unit
550	Knürr EliMobil®	00.306.981.9	1 unit

Right from the very beginning

# Project Management

Take advantage of our expert knowledge, which we have been gathering for decades in numerous customer projects in various industries.

Our **project managers** are your contact partners. They are the interface to you and are responsible for the project planning in accordance with your individual requirements profile. Depending on the complexity of the task at hand, they put together a **professional team** of specialists from the most diverse disciplines.

Numerous factors are incorporated – from the creation of a list of functional specifications, budgeting and deadline planning, through to special design specifications and technical integration, right on through to compliance with standards and guidelines.

During the **product design** phase, industrial designers and technicians work closely together to harmonize form and function. With the assistance of 3D-CAD models, you check the result and can integrate your suggestions at any time.

**Prototyping** is also firmly in the hands of experts who are hard at work incorporating your requests and suggestions into an initial specific product.

## Design and function

# Design

Using the most modern CAD applications, we design your products, which set new standards in terms of technology and aesthetics. On the basis of the planned details, 3-D views, design studies and volume models emerge, which represent the most realistic state of development progress and enable modifications in line with your wishes at absolutely any time.

Your company-own corporate design is also integrated with our proposals for materials and color. Ultimately we ensure a smooth technical and technological integration while complying with UL, CSA, VDE or TÜV/GS standards. Only when these stages have been fully completed, can the first prototype be produced.

## Exemplary results

# Production and logistics

After production release by the customer our sophisticated **logistics concepts** go into operation. Customized planning procedures are integrated and smoothly implemented in our **Supply Chain Management**.

We produce application-specific equipment trolleys in ultra-modern **industrial production procedures**.

And in the production phase our employees guarantee the best possible end product with their long years of experience in parts production, packaging and shipping, supported by our integrated **quality assurance procedures**.

This also includes extensive **packaging expertise**, equipped for global shipping and the toughest environmental conditions.

OEM

# Individual solutions

Our standard modules mean the possibilities for unique originals are practically unlimited.

**Help us with your requests!** Ask us about your original and stand out on the market with your equipment trolley with customized design, harmonized with your company image (CI/CD).

Our expert **Design and Technology** Team will be happy to optimally and specifically meet all customer-specific requirements – assuming the appropriate batch sizes.

“Avail of our long years of **experience**, which we use to ergonomically, technically and optimally incorporate our mature and flexibly adjusted product platforms and components into your **individual solution**.”

MOB20084

# WE PUT SPACE TO WORK. WORLDWIDE

Emerson is based in St. Louis, Missouri (USA), and as a leading technology and development specialist provides globally innovative customer solutions to industry, business and consumer markets in the areas of network power supply, process management, industrial automation and thermal management, as well as the corresponding equipment and tools.

The Knürr Technical Furniture manufactures and develops workstations for electronics labs and mobile equipment carriers for healthcare and automotive industries. Furthermore Knürr is the specialist for height adjustable control room workstations.
