Shoe Cover Dispenser

Webb automatic shoe cover dispensers are a time-saving and hassle-free method of covering shoes of professionals and guests entering your clean room dust free zones without having them to remove footwear prior to access. More importantly, it can avoid communicable biohazards and enable clean, healthy and dust free environments. Ingress of dust into a datacentre results in reducing the operational lifespan of your active components.

In addition, these units require no electricity; but works on traction and extension mechanism with a handle bar for stability.
